

BIOLOGY

Biological Sciences include the study of life from the simplest forms of plants and animals to the highly complex structure of the human being. It includes the study of how organisms are structured as well as how they function and relate to each other. The biology curriculum prepares students for graduate study, academic and industrial research positions, secondary education, quality assurance, forensic science, non-for profit environmental and conservation area as well as entry into medical, veterinary, dental, and other professional schools.
