

NEUROSCIENCE

Neuroscience is a comparatively recent interdisciplinary field that reflects connections between the natural sciences and the behavioral sciences, especially biology and psychology. Practical, hands-on research experience is an important component for understanding the discipline of neuroscience. At Carthage, neuroscience students begin their own research early and conduct research often, working closely with faculty to hone their skills and prepare for careers or graduate school

SKILLS

- Instructing
- Coordinating
- Attention-to-detail
- Making decisions
